A heritage of craftsmanship.

Located in Morrisville, Vermont, we know about keeping your home warm and comfortable in all seasons. For years, our dedicated Vermont craftsman have been committed to building quality stoves, handcrafting each HearthStone to meet the highest standards using the finest materials and the most advanced heating technology. As proof, every HearthStone soapstone stove is signed by the stove builder.

HearthStone

**Sustainable
green energy.**

Leaders in wood burning technology.

TruHybrid™

heatlife™

Our TruHybrid™ stoves burn cleanly and efficiently before and after you engage the catalyst.

Delivering long-lasting, comfortable heat.

The cleanest wood burning products on the planet.

Ultra Clean: The TruHybrid™ system combines primary and secondary combustion with tertiary combustion using a catalyst to take care of any unburned smoke particles and gases.

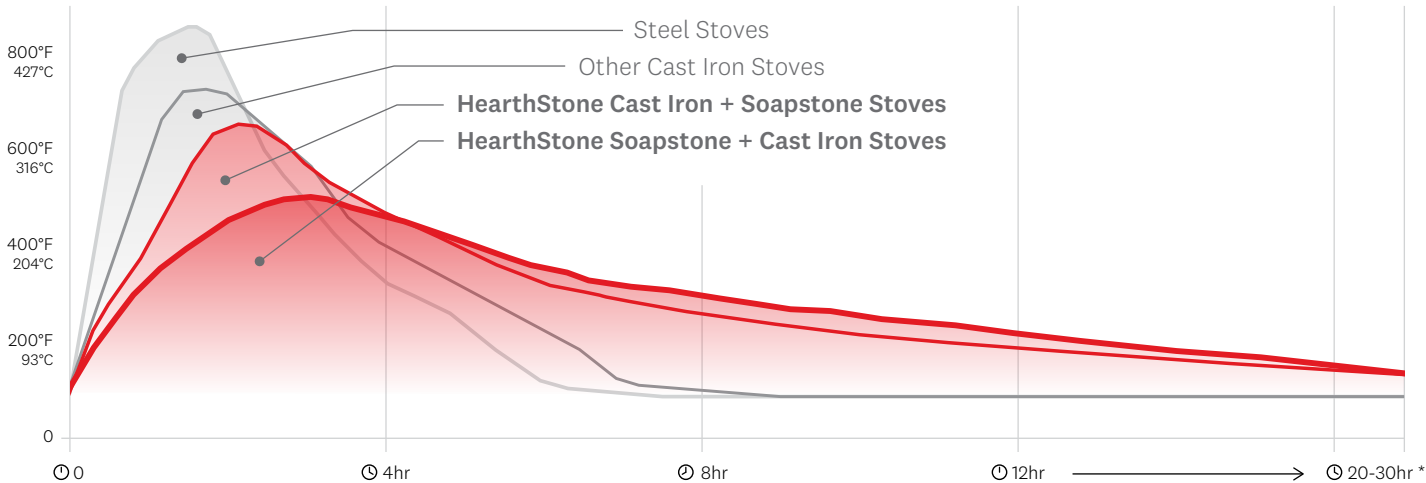

Uber-Efficient: The TruHybrid™ system burns clean even if you forget to engage the catalyst! Engage the catalyst to complete the combustion and get as much heat from your wood as possible.

HeatLife™ is HearthStone’s way of measuring the total hours of usable heat from a single load of wood. Our soapstone-lined fireboxes retain the maximum amount of heat from your fire and radiate steady warmth as it burns, delivering long-lasting, comfortable heat.

Wood is a renewable and sustainable resource that supports local communities. Heating with wood has a carbon neutral footprint when burned in a highly efficient HearthStone TruHybrid™ product. All of our wood burning products exceed 2020 EPA standards so you can be sure they burn clean today and for many years to come.

heatlife™

Long-Lasting Comfortable Heat

* Burn times are dependent on the product model, installation, draft, wood type and moisture content, and air supply setting used.

The Soapstone Family

Castleton

Wood Stove Model 8031

Clean and efficient with extra long burn times.

Efficiency

77%

HHV

HeatLife™

20

Hours

EPA Certified

0.69

g/hr

Features

TruHybrid™ System

A 3-tube secondary combustion system with a fixed baffle ensure a clean burn before the catalyst performs the finishing touches.

Convenient Firebox

The square shape of the Castleton stove is perfect for loading the wood either side-to-side or front-to-back.

Easy to Use

Control the stove with one lever. Turn your stove to high and stoke a big fire. Turn it all the way down to keep a fire burning overnight.

Wood Cook Stove

Deva

Model 8220

A full service range powered by wood, the Deva is perfect for living off grid.

Features

Baking Oven

The ample oven is constructed from stainless steel, equipped with racks, visible and large enough to cook a 20 pound turkey.

Ceramic glass cook top

The ceramic glass cooking surface is easy to clean, scratch resistant, and spacious enough for a number of pots and pans.

Temperature control

Keep a consistent temperature when baking by adjusting a simple control which regulates the amount of hot air circulating around the oven.

The Gas Family

Bristol DX *Model 8763*

The best looking cast iron gas stove available today.

Features

Style and Quality

Beautiful designs, careful craftsmanship and reliable technology. The quality of our products is displayed in the intricate details of the cast iron and the warm flickering glow of the fire.

Fully loaded convenience

Our DX gas stoves include a built-in blower and thermostatic remote control. Adjust the fire, the room temperature, and the blower all from the comfort of your couch.

True efficiency

The Bristol includes a cast iron heat exchanger and a built-in blower to circulate more heat into your home.

The Gas Family

Waitsfield DX *Model 8770*

HearthStone's original classic three sided gas stove.

Features

A versatile heater

The Waitsfield DX presents a beautifully balanced fire at a wide range of operating levels. It has a 2-stage burner that let's you turn the stove up high or down low for more or less heat and light.

Easy, on-demand comfort

The Waitsfield DX includes an easy to use remote control. Turn the stove on, adjust the flame, set the room temperature, and adjust the blower to keep the room cozy.

Convective heat

The Waitsfield DX includes a cast iron heat exchanger and a built-in blower to distribute the heat around your room for comfort and lower energy costs.

The Gas Family

Stowe

Model 8325

The Stowe is compact, easy to use, and reliable addition to your living space.

Features

Enameled cast iron

The small size and beautiful style of this cast iron stove inspired us to offer it in our unique oyster enamel, as well as our classic brown enamel and matte black.

Easy to use

The Stowe 8325 maintains a standing pilot which will shut off after 7 days of inactivity. It can be run manually, with a standard or programmable thermostat, or with an optional remote control.

Efficiency you can feel

In addition to burning cleanly, the Stowe uses a cast iron heat exchanger to move the heat from the fire into your home, not up the chimney.

The Gas Family

Champlain *Model 8304*

The Champlain will add a touch of classic style to your room.

Features

Artfully balanced fire

The Champlain gas stove has been carefully designed to present a balanced, gently flickering fire on both low and high settings.

Convenient control

The Champlain 8304 maintains a standing pilot which will shut off after 7 days of inactivity. It can be run manually, with a standard or programmable thermostat, or with an optional remote control.

True efficiency

The Champlain includes a cast iron heat exchanger above the fire. Natural convective airflow moves air through the vents of the stove to warm your room.

Accessories

Soapstone Steamer.....90-99112

Recommended for all wood burning stoves, the steamer adds moisture to the air to help balance the drying effects of a wood fire. Just fill the steamer pot with water and set it on your stove. They’re great for aromatherapy too. Simply add some essential oils or fragrant herbs to the water.

Stove Top Thermometer90-99120

Recommended for soapstone stoves, the stove top thermometer helps you keep your stove burning within the optimal temperature range for safe and efficient heating.

Draft Inducing Flue Collar90-99099

Recommended for installations with poor draft, the draw collar heats up your chimney to ensure a proper draft. Fits 6" flue.

Draft Meter90-99000

Recommended for wood stoves installations, the draft meter allows you to measure the draft in your chimney. Proper draft is necessary for clean and efficient wood burning.

Wall touch pad..... 7000-260

The wall touch pad and be installed on a wall to turn your stove on/off and adjust the flame height. This accessory works with all of our stoves that use the Maxitrol GV60 ignition system.

Leather Safety Gloves.....90-99031

Durable and dependable, our leather safety gloves are thick and protective, with a soft inner lining. One size fits all.

Tempered Glass Hearth Pad, Circular, Diameter: 35½"91-84800

Tempered Glass Hearth Pad, D-Shaped, 33½" x 43½" 91-84750

Tempered Glass Hearth Pad, Square, 39½" x 39½"91-84400

Tempered Glass Hearth Pad, Semi-Circular, 55" x 43¼" 91-84700

Specifications : Reference information

Gas

(10) P.4.1.09 Fireplace Efficiency informs the Canadian **EnerGuide** rating. **EnerGuide** is a Government of Canada rating system that provides consumers with comparative information on the energy performance of energy-using products sold in Canada.

For more information on the **EnerGuide** Program, please visit the **EnerGuide** Web site: oee.nrcan.gc.ca/equipment

(11) Steady state efficiencies vary dependent upon installation, venting configuration, altitude, gas values, and other installation variables.

(12) Heating capacity is an approximation dependent upon floor plan, ceiling height, house construction, venting configuration, heat loss, and geographic location of home.

(13) All measurements are taken from the closest surface of the unit. Clearances in this catalog are for reference only. Refer to Owner's Manual for exact specifications prior to installation.

Wood

(1) The amount and weight of wood contained per cubic foot of firebox volume can vary from 15 to 36 lbs. per cubic foot depending on type of wood, moisture content, packing density, and other factors. As a constant for comparison and test purposes, we are assuming 20 lbs. of seasoned hardwood per cubic foot of firebox volume.

(2) See Owner's Manual for specific alcove clearances and alcove hearth pad requirements.

(3) Heat output will vary depending on frequency of loading, the dryness and quality of wood used, packing density, and other installation variables.

(4) Notes on HHV efficiency: HHV efficiency is published by the EPA on the Certified Wood Heater Database*. HearthStone publishes Higher Heating Value (HHV) efficiency percentages. These HHV values are LOWER than LHV by 5-7%, yet many manufacturers choose to publish the LHV percentages to improve their appearance. LHV is used by the IRS to qualify products for tax credits. When comparing products, make sure you're comparing LHV to LHV or HHV to HHV.

* <https://cfpub.epa.gov/oarweb/woodstove/index.cfm?fuseaction=app.search>

(5) Heating capacity is an approximation dependent upon type of wood, loading configuration, floor plan, ceiling height, house construction, venting configuration, heat loss, geographic location of home, and other usage and regional variables.

(6) HeatLife™ is a trademark of HearthStone Quality Home Heating Products and is defined as the quantity of heat stored within the thermal mass of the stove. Used here, it refers not just to burn time but to total hours of usable heat from a single load of fuel.

(7) Clearances on this page are for reference only. Refer to the Owner's Manual for exact specifications prior to installation.

(8) The Manchester rear heat shield is built in; there is an optional Close Clearance heat shield which may further reduce rear clearances to 6".

(9) See Owner's Manual for specific hearth material and R-value requirements.
